Log In

- Keep the current overall design, especially the background, text, and layout. Only update or modify the functionality and elements.
- When users type in the email and password fields, there should be a hover/active effect for better user interaction.
- **PASSWORD FIELD:** The password should be hidden (displayed as asterisks or dots) while typing. It should only be revealed when the user clicks the eye icon.
- **REMEMBER ME:** Include a checkbox option.
- **TERMS OF USE AND PRIVACY POLICY:** These should be separate. Provide realistic placeholder content and make them scrollable. When clicked, each should open in pop up/modal view.
- When hovering on the clickable buttons, indicate that it is clickable and change the color slightly for better user interaction (this counts through the whole system)

SYSTEM LOGO

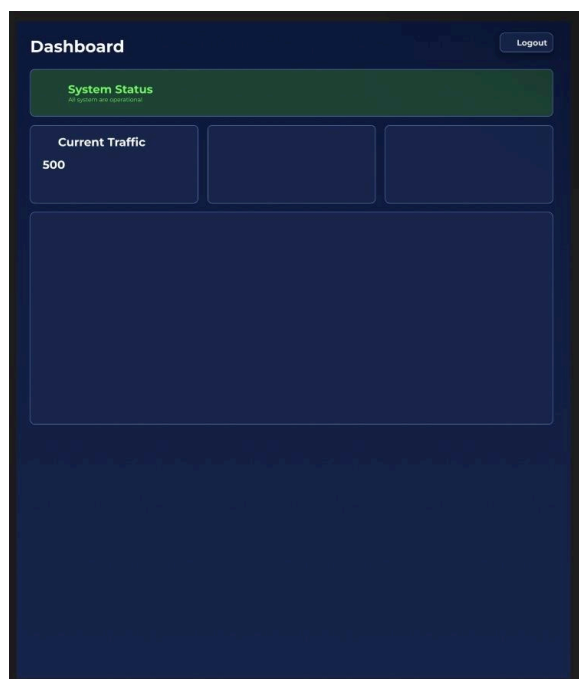

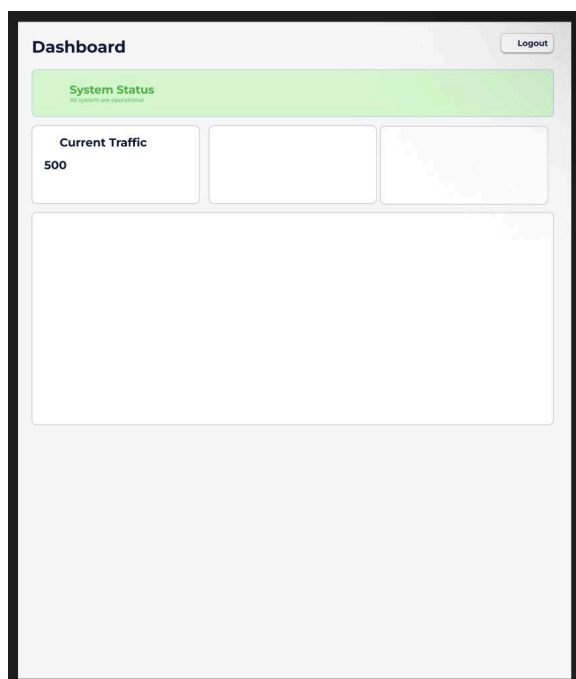

CAPITAL LETTER "G"

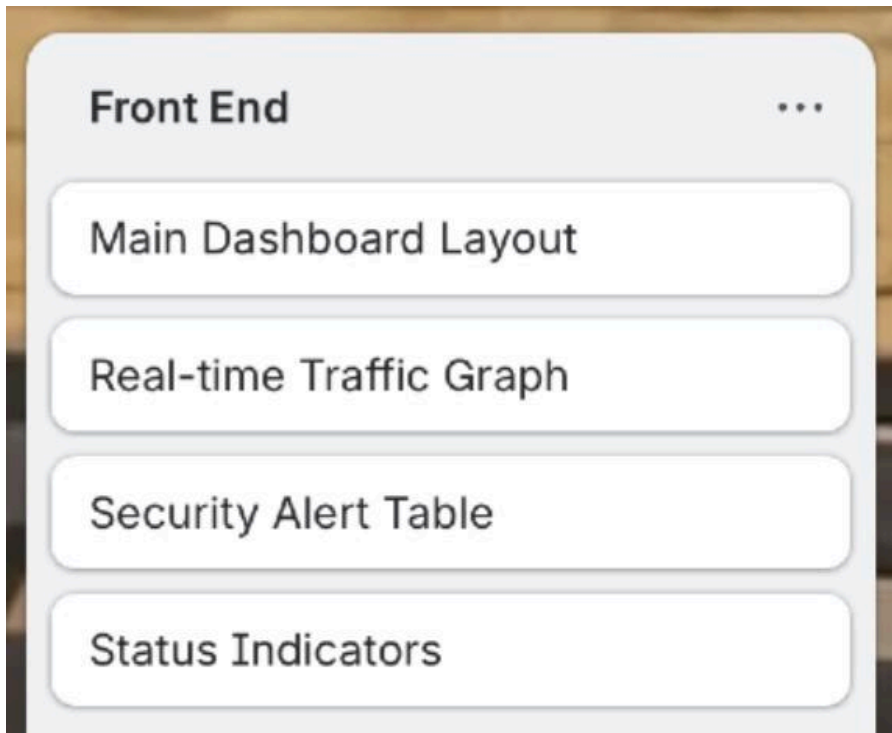

Dashboard:

The home tab is the dashboard

Keep this layout throughout the whole dashboard.

- **LOGOUT** : when clicking the logout button there will be a pop up and when choosing cancel it will remove the popup

- INDICATE A SYSTEM SECURITY LOGS AS WELL AS A LIVE CAMERA FEED
- CREATE A SIDEBAR QUICK ACTION BUTTONS FOR MAIN DASHBOARD LAYOUT, REAL-TIME TRAFFIC GRAPH, SECURITY ALERT TABLE, STATUS INDICATORS AND LIVE CAMERA FOR QUICK ACCESS
